### **Increased efficiency and continuous improvement**

- Measure your procurement execution activity in real time, Identify bottleneck and dependencies easily
- Proactively plan, strategize, execute, monitor / analyze categories for higher RoI

# ProjecTRAC in Action

**A Fortune 500 multinational food manufacturing company.** The customer did not have a single place where all procurement projects were being tracked and monitored, resulting in regional silo-ed tracked and practise with no consolidated view to what procurement as a function was spending their time on. Further savings approval and tracking were offline on emails and regional excels with an exhaustive exercise at the beginning of the month to feed new savings. ProjecTRAC was introduced as a one stop solution for all procurement projects along with savings tracking and reporting helping customer streamline the procurement process across region and bring in consistent way of working and reporting. Customer was able to reduce the inefficiency significantly by digitizing the data collection process.

## **A Leading Social Medial company**

used ProjecTRAC to centralize intake of requisitions, sourcing and contracting request for direct technology and other areas. By having all project task and hours spend recorded in ProjecTRAC, the team was able to quickly build operational models to forecast demand and respond to it faster with visibility to teams' workload.

**An aerospace company building first electric vertical take-off and landing jet** was using Excel, Teams Planner and emails to work with business stakeholders and suppliers. As the projects increased it became increasingly difficult to manage projects leading to delayed response, unhappy stakeholders, increase manual effort to report. ProjecTRAC provided them a right ground to align their engagement process, project intake and triage, project tracking and savings capture in one place.

## **Global Specialty Chemicals Manufacturer**

ProjecTRAC was at the heart of a global source-to-pay transformation acting as a procurement Help Desk and centralized intake for all procurement needs. Customer gained efficiency by leveraging operational dashboards for cycle time, capacity utilization, ageing reports. Brought Buy channel optimization through a triage mechanism to reduce maverick spend with 75% increase in spend under management.
